

Amendment to Specification
submitted October 2008

The now-submitted amendment consists in the addition of a sentence between the title and the paragraph numbered [001], as:-

Title: THERMAL CONTROL OF FLOWRATE IN ENGINE COOLANT SYSTEM

This patent application derived priority from US patent application number 10/330,108 filed 30 December 2002, and from international patent application PCT/CA2003-/002017 filed 20 December 2003.

[001] This invention relates to coolant pumps, especially for automotive internal-combustion engines. The invention is aimed at providing a coolant pump which efficiently delivers flow characteristics in accordance with engine demand.

Exhibit 6
